Basic Information + Tutorial

1. Choose your preferred language

Select...

2. Survey Explanation

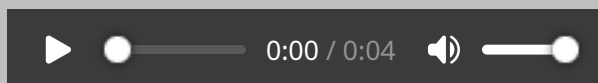

This survey aims to understand your opinions and feelings about rhythm, helping this research gain insights into how people perceive these temporal aspects. You will be asked to listen to some rhythms and compare how similar they are. Please listen to each of the audio files completely. The rhythm will not vary in pitch, tempo, volume, or any other auditorial aspects other than the time between each event. Each audio file is about 5 seconds long, and the whole survey will take approximately 5 minutes.

3. Survey Disclaimer

Other than the time it takes you to answer each question, this research will only collect the information you provide, including the language, age range, and your response to the questions. Contact stevesg168@gmail.com with questions.

4. Example

This is the kind of audio that you may hear in the survey. Listen to the audio in full.

5. **Key points**

Notice that the instrument, volume, or pitch does not change. In all the audios, only the timing will change.
